Neilsen Technical "BEST IN CLASS" Garments are engineered to be extremely durable, breathable while maintaining a 100% waterproof and windproof barrier protecting against all elements with unequalled designs and construction quality.

For over 25 years we have manufactured our garments in a state of the art Gore globally licensed facilities using the very best bill of materials and components. GORE-TEX PYRAD, PRO ARC materials combined with 3M Reflective Tape, YKK and Velcro fastening ensuring a superior quality product for years of service offering customers long-term financial savings by reducing replacement.

Since the introduction of Neilsen Rainwear to the North American in 2010 we have been recognized by our 40,000+ wearers as the market leader in the Rainwear category. You have finally found a rainwear manufacturer who understands the environmental conditions and risks that the wearer is challenged with whilst conducting their daily duties effectively.

The most important consideration to Neilsen is the wearers wellbeing and safety, when issued with our waterproof & breathable rainwear or high voltage FR/ARC garments wearers are safe, comfortable and productive which can increase the moral throughout the workplace. We are a company that takes pride in manufacturing garments that wearers "want" to wear and fit for purpose.

"We endeavour to supply our wearers the highest quality garments at an exceptional value"

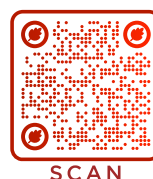

Neilsen Clothing Inc.

ARC RATED PRO ARC® GARMENTS

COMFORTABLE, RAINWEAR

CAT 3 ARC RATED

Protection
(30 cal / cm²)
